Geopolitical Studies, Global Security Assessments & Training

- Geopolitical and Country Risk Reporting
- Security & Threat Assessment on geopolitical developments, terrorism, crime, civil wars
- Security surveys at different kind of facilities such as seaports, oil rigs and terminals
- Collection, analysis and assessment of Middle-Eastern and Jihad related intelligence
- Evaluation of global terror threats, Jihad, grassroots cells, up-to-date reviews of strategic issues, in the Middle-East and Islamic world.
- Preparation of ad-hoc documents like manuals and site surveys reports
- Delivery of high-end security courses and training (hostile environment, defensive driving, training to police forces and gov. bodies)

Headquartered in **Milano**, Italy, M&P has established three other international operational bases in the EMEA region:

Amsterdam

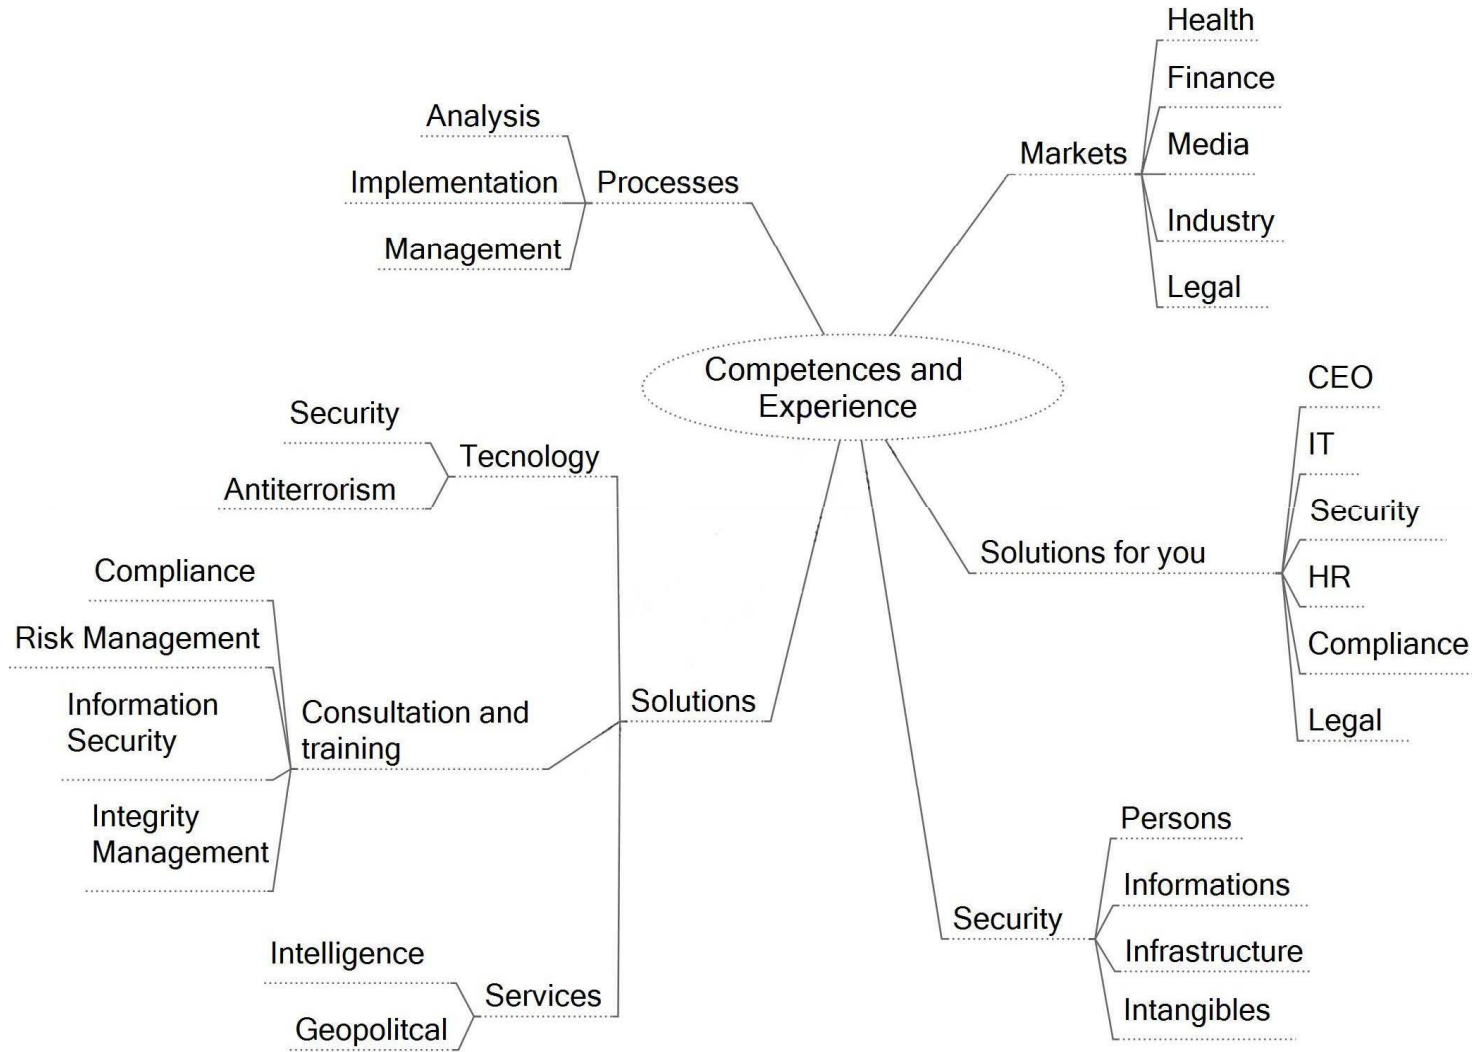

Newly established, it is in charge of commercial and marketing activities in the northern and eastern European countries. It also coordinates all international activities of the Group.

Tel Aviv

Advanced competence center for technology scouting, partnerships, new services and geopolitical studies.

Nairobi

Base of highly specialized and experienced professionals for risk analysis, security projects, intelligence and training (up to military grade training). Able to operate all over Africa.

OUR PORTFOLIO OF PRODUCT AND SERVICES

A very brief overview

Video-sensors

Active video surveillance systems, able to “learn” what to detect and what represent a danger/alarm .

Inductive Fence's sensors

Very advanced vibration sensors that make ‘smart’ any old fence, including those near trains and airports

Biometrical Identity Authentication

One of the most advanced and accurate vocal identification on the market (free speech or for applications). 4 “A”s system: Authentication, Authorization, Administration and Audit

M2M - Machine to Machine

Secure communication system M2M, for the management and centralized control of any kind of sensor (temperature, fire, gas, oil, alarms) and in multiple locations. Energy Data Management approved.

Water Security Management

Comprehensive solutions for the protection against the threat of accidental and intentional contamination.

Anti-explosives devices

screening and detection equipment for letterbomb, contraband and explosives detection.

Vulnerability Assessment

Our methodologies incorporate various open source and proprietary tools. M&P is committed to working with you through the vulnerability management process to ensure on-budget, on-time, value-added services.

Penetration Test

During penetration testing engagements, our consultants assume a pre-agreed upon role, usually that of an outside motivated attacker or an internal malicious employee.

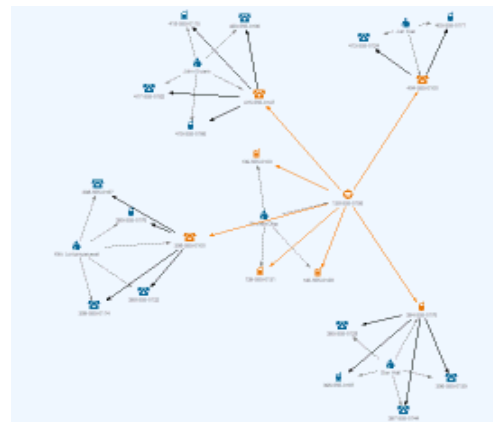

Secure Communication

M&P distributes different very advanced software, easy to install, which make mobile communication crypto and completely secure.

Online Intelligence (Webint)

Collection, analysis and assessment of Middle-Eastern and Jihadi related intelligence. These include, among others, evaluation of relevant global terror threats, up-to-date reviews of political-military affairs in Iran and the Persian Gulf, worldwide Jihadi as well as public opinion at large in the Muslim world. All information is based on internet-sourced intelligence material, such as designated sites, forums and web-logs in Farsi, Arabic, Russian, Turkish and English that are relevant to current and future events.

Traffic Analysis Solution

Fully integrated investigation platform for generating crucial intelligence insights out of call and IP data records. The system provides analytical tools for generating new intelligence leads: identifying new targets and exposing potential targets. Furthermore, it brings clarity to complex investigations by exploring relationships between suspects, their associates and their organizational hierarchy. For law enforcement agencies, intelligence services and public prosecutors.

is a tool developed to support the Security Managers and Risk Managers in the mapping of the operational risks that impact on the company's critical processes and their resources.

The software allows giving a precise Governance structure, effective and measurable to the management of the company's operational risks, including also the Compliance checks in respect of the current normative, certifications, international standards and internal regulations.

answers the need of the public administrations of municipalities, provinces and regions, interested in mapping on a geo-referenced map criminal and urban degradation phenomena. It has multiple uses, such as:

- Monitoring of the territory and of the areas at risk
- Optimization of the resources and protective measures

towards the real priorities

- Identification of criminal variables and representation of risk forecasts, considering the changing conditions
- Collection of weak signals and sending of early warning signals within possible risk situations
- Measurement of risk mitigation versus the adopted activities (ex: more police forces, more illumination, traffic closure, new licenses for public places, changing in the road traffic flows, etc.).

WebSan is the first software platform dedicated entirely to the medical and healthcare sector, with the objective of simplifying the privacy management processes. Designed to be adopted both by small doctors' offices and more articulated larger structures, it has a simple and intuitive interface that guides the user towards the passages and the fulfillment required by the current normative.

M&P Group's professionals are able to collect, focus and filter information from across the security spectrum, and to produce prompt and reliable analysis on every country's security in **Africa and the Middle-East**, paying special attention to the security of local employees and workers, considering and evaluating critical socio-political variables like terrorism, crime or corruption.

With our suite of reports and services our Clients can check on the dangers affecting individual countries, receive detailed intelligence on what is happening and possible risks around specific places, infrastructures, companies or people, and perform high profile investigations and due diligences on international financial operations, dangerous affiliations, reliability of business contractors or insurance frauds.

Security managers at plants and infrastructures in countries at risk will also find analysis on key topics like terrorism trends by tactic or target, propaganda and radicalization, counterterrorism operations, prevention and mitigation strategies.

Our services also provide alerts giving early warnings of deteriorating situations, risks and threats.

The M&P Group has been operating in the security field for almost 40 years and it accumulated an extensive experience and know-how in geopolitical assessment and country risk reporting.

The establishment of the **operations in Israel and Kenya** represents the apex of the Group's presence on the market and an upgrade of its international reach and operational capabilities.

With highly experienced collaborators, sources and professionals distributed in virtually any corner of the globe, from the **Middle-East to the Persian Gulf, from the Horn of Africa to Central Asia**, the M&P Group is well positioned to provide wide range of services based on a solid expertise in:

- ✓ Geopolitical and Country Risk Reporting
- ✓ Security and Threat Assessment focused on geopolitical developments, terrorism, crime and civil wars
- ✓ Security surveys at various types of facilities,

with an emphasis placed on secured sites, seaports and marine vessels and installations, oil rigs and offshore terminals

- ✓ Specific knowledge and monthly updated reports on IED (Improvised Explosive Devices).
- ✓ Preparation of ad-hoc documents like manuals and site surveys reports
- ✓ Delivery of security courses
- ✓ Business Intelligence, including due-diligence and pre-employment checks
- ✓ Insurance Investigations and Litigation Support

Our unique capabilities also include the collection, analysis and assessment of Middle-Eastern and Jihad related intelligence from web sources, technical evaluation of global terror threats, worldwide Jihad, grassroots cells, up-to-date reviews of strategic issues, in the Middle-East and Islamic world.
